

**ButterFly: A discreet and silent flying insect killer for cafes, restaurants, food production and pharmaceutical factories, hospitals, etc.**

**ButterFly** humane electrical discharge insect control units are designed to actively protect food production facilities, restaurants, cafes, etc. from flying insects. The glueboard is inside the device. Insects killed with **ButterFly** stay out of sight. **ButterFly** is made of corrosion resistant material, which means the machine can be wall mounted directly above the food. Due to the silent extermination and the attractive butterfly design, this model is perfect both for back and front of house facilities. **ButterFly** will not distract customers with endless zaps and clicks as it works in absolute silence.

**ButterFly** insect killers come with either standard UV tubes or with shatterproof tubes, which allows using them at pharmaceutical factories and food production facilities.

### Specifications

Model	Body color	Protection (m <sup>2</sup> )		Information		UV tube, type
		Op.	Max.	Dimensions (mm) L x W x H	Weight (kg)	
ButterFly BF-15W	White	120	400	540 x 540 x 160	2,7	Y615; Y415
ButterFly BF-15S/St	Stainless steel	120	400	540 x 540 x 160	2,7	Y615; Y415
ButterFly BF-15W=IP65	White	120	400	540 x 540 x 160	2,7	Y615; Y415
ButterFly BF-15S/St=IP65	Stainless steel	120	400	540 x 540 x 160	2,7	Y615; Y415

### Unusual design

The machine design is quite original, which makes it a good choice for various room usages.

### Extensive protection area

The glueboard is maximally open to the insects, which further increases the ButterFly's efficiency.

### Highly efficient UV tubes

The standard machine comes with standard UV tubes, but they can easily be replaced with unbreakable (shatterproof) tubes.

### Rugged construction

There are two versions of ButterFly: enameled steel (white) and food grade stainless steel. The units can also have special protection from dust and moisture (IP65).

### Mounting options

Typically, the unit is attached to the ceiling, but it can also be mounted on supports, various pipes, ducts, all kinds of cable channels etc.

### Glueboards

ButterFly flying insect killer units are equipped with glueboards manufactured by Fly Trap Commercial, the industry leader. The efficiency of these glueboards has been proven over dozens of years and they are rightfully considered the best available on the market.

### Easy cleaning and maintenance

The only maintenance required is timely replacement of glueboards covered with killed insects. With ButterFly, this operation takes 7 seconds and does not require dismantling the unit.

### Quality certificate

Complies with Euro standards, SanPin and GOST-R.

### Reliability

Guaranteed service life of at least 3 years.

## KILLS ABSOLUTELY ALL FLYING INSECTS: FROM SMALL MIDGES TO CHAFER AND LOCUST

The special pheromone-laced glueboard attracts and without fail kills insects such as midges, mosquitoes, flies, wasps, moths, horseflies, whiteflies, fungus gnats, chafer, locust, tobacco beetle, carabus, etc.
