

YUTEC Sniper PRO, competitor of the EXOCUTOR and EuroKill (UK), the most popular flying insect control units in Europe.

YUTEC Sniper PRO insect control unit is the closest equivalent of the UK-made EXOCUTOR and EuroKill, the units favored by the food industry in Europe. They are made of corrosion-resistant materials. The units can be successfully used at food processing plants, catering and medical establishments, pre-school, secondary and higher education institutions, clean rooms, etc.

YUTEC Sniper PRO comes with special UV tubes (either standard or **shatterproof**).

Specifications

Model	Body color	Protection (m ²)		Information		UV tube MAIN
		Op.	Max.	Dimensions (mm) L x W x H	Weight (kg)	
Снайпер SNIP-16AI	Silver	40	120	340 x 100 x 260	1,8	Y508 T5L
Снайпер SNIP-30AI	Silver	80	240	340 x 100 x 260	2,0	Y515 T5L
Снайпер SNIP-40AI	Silver	120	400	650 x 100 x 360	4,0	Y618 T8L
Снайпер SNIP-60AI	Silver	180	600	650 x 100 x 360	4,3	Y618 T8L
Снайпер SNIP-80AI	Silver	240	800	650 x 100 x 360	4,5	Y636 T8L
Снайпер SNIP-120AI	Silver	360	1200	650 x 100 x 360	4,8	Y636 T8L

Classic design

The unit's design is classic

Extensive protection area

Special UV tubes located in the central part of the unit attract insects from all around and secure up 360 m² of area daytime and 1200 m² at night.

Highly efficient UV tubes

The standard model includes standard UV tubes so the unit starts working right after they are switched on. The standard UV tubes can easily be replaced with unbreakable (shatterproof) tubes.

Rugged construction

The unit is made of metal coated with silver enamel. It is rugged and reliable.

Multiple mounting options

Mounted on a wall, suspended from a ceiling and placed on a table.

Innovative grid

Large unique triangular grid providing greater insect control efficiency. Compared to many units manufactured in the Far East, it is safe for human use.

Easy cleaning and maintenance

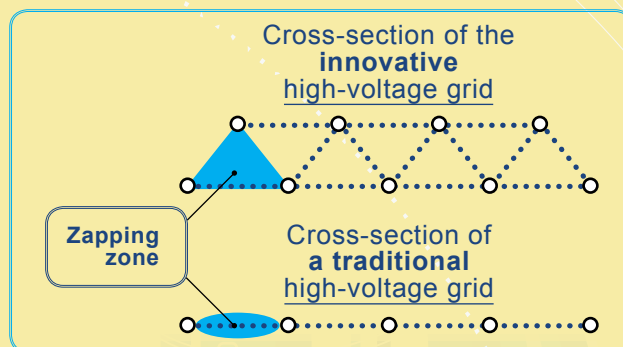

Removing the tray does not automatically switch off the unit, but there is no direct access to the 4,000 volts grid. To completely shut down the unit, you need to trip the circuit breaker or disconnect the plug from the socket (220 volts).

Quality certificate

Complies with Euro standards, SanPin and GOST-R.

Reliability

Guaranteed service life of at least 3 years (excluding tubes).

KILLS

ABSOLUTELY ALL FLYING INSECTS: FROM SMALL MIDGES TO CHAFER AND LOCUST

High-voltage grid instantly kills all flying insects such as midges, mosquitoes, flies, wasps, moths, horseflies, whiteflies, fungus gnats, chafers, locust, tobacco beetle, carabus, etc.
